## Conventions and abbreviations

### Conventions

The hyphen indicates a prefix or suffix and the sign <> an infix, while the equal sign indicates a clitic, e.g., =*i* ‘yes/no question’.

A boldface indicates an anticipated segment missing in the original text.

The punctuation marks “ ” are used to enclose a direct quotation, and the single marks ‘ ’ for enclosing a quotation within a quotation.

### Abbreviations

Nonstandard abbreviations (those not given in the Leipzig Glossing Rules) used:

ACHI, achieved

AV, actor voice

COS, change of state

LNK, linker

LV, locative voice

NEU, neutral

NUM, numeral

ORD, ordinal number

PV, patient voice

RED, reduplicaion

EVID, evidential

STA, stative

# Introduction

PAUL JEN-KUEI LI

## 1. General background

Lha’alua (Saaroa)<sup>1</sup> is critically endangered with only a few (less than ten) older speakers left today, as compared with about 350 speakers when Tsuchida (1976: 59) investigated it in 1969. It is the least studied and poorly understood extant Formosan language. There are only a few Lha’alua texts in print: eight in Japanese by Asai (Ogawa and Asai 1935: 702-719), three in Chinese by Paul Li (1997: 295-297), and four in Chinese by Chia-Jung Pan (2018b:198-207). As of today, there is not any Lha’alua text published in English as yet. An aim of publishing this monograph is to fill this gap.

The texts in this volume have been collected by different linguists in the different periods of time: twenty-six texts collected by T’ung-ho Tung in 1962, twenty-four texts by Shigeru Tsuchida in 1969, five texts by Pang-hsin Ting in 1976, three texts by Paul Li in 1999, and five texts by Chia-Jung Pan in 2008. Tsuchida typed up his thirteen texts with a typewriter and gave interlinear glosses in English and free English translations except for Texts 11-13, for which my assistants<sup>2</sup> and I worked out text analysis, interlinear glosses and translation based on his field notes. His eight other texts in the rough shape of field notes are missing. Tung and Ting typed up their texts with typewriters and gave Chinese glosses and free Chinese translations. Yichun Chen, my research assistant, had to retype some of these texts in computer Word files. She and I worked out the interlinear glosses together. I gave all the free English translations, as based on the Chinese versions recorded by Tung and Ting. Unfortunately, free Chinese translation was only available for Tung’s first five texts. I had to figure out free translations for the rest of his shorter texts, Texts 6-26, as based on the Chinese word glosses given in each sentence or passage. Pan worked out his own texts all by himself. The bulk of texts in this volume were collected by Tung and Tsuchida.

The same or similar stories may have been recorded by different linguists as told by

<sup>1</sup> The correct pronunciation of the language name is *Laʔalua*, Romanized as Lha’alua. However, Asai mistranscribed it as Saaroa in 1931, and it is the name generally known and accepted. Both forms are used in this monograph. I would like to thank the anonymous reviewers for many valuable suggestions for corrections or improvement.

<sup>2</sup> It is Hsiu-min Huang, who worked out the Chinese word glosses and free translation for Texts 11-13, based on Tsuchida’s field notes in Japanese.

different speakers, including the big flood recorded by Asai, Tung, and Ting, shooting the sun, the monkey and pangolin, the sand-eater, and the underground by Asai and Tsuchida, and on marriage by Tung and Ting. In fact, Asai had earlier recorded in Japanese the big flood by two different speakers in two separate texts. The expressions and syntactic structures are often different as told by different speakers, so there is not much repetition or duplication linguistically in most of these texts. But there is an exception: Ting's Text 2 on the big flood is very similar to Tung's Text 2; they may have consulted the same informant. The transcriptions by Tung, Tsuchida, and Ting are generally reliable, and there are very few typos in their materials. But we had to insert the intervocalic glottal stop that Tung left out, e.g., *cucuʔu* 'person'.

Previous publications on the Lha'alua language include Asai's (Ogawa and Asai 1935:693-720) sketch grammar and texts written in Japanese, Yan's (1964) preliminary comparison of Kanakanavu and Lha'alua, Ting's (1967) phonetic description in Chinese, Tsuchida's (1976: 59-83) sketch grammar and Tsuchida (1989), Starosta (1996) and Chang (2006) on the position of the language, Paul Li's (1997: 272-297) sketch grammar and texts in Chinese, Paul Li (2006) on the traditional songs, Radetzky (2004), Chiu (2008), Chao-lin Li (2009, 2010), Wolff (2010: 127-140) on the historical derivations, Pan (2012, 2014a, b, c, 2015, 2016, 2018a, b, 2019, to appear), Liu et al. (2015), Teng and Zeitoun (2016), which discusses the noun-verb distinction, as based on evidence in pronouns. Both C. Li (2010) and Pan (2012) are PhD dissertations on the language, while Chiu (2008) is an MA thesis on the language loss and revitalization of the language. Liu et al. (2015) discusses the language shift of Kanakanavu and Saaroa to Bunun. Evidentiality was observed and discussed for the first time in Formosan languages by Pan (2015, 2016, 2018a) although it is not so elaborate as in Tibeto-Burman languages, as discussed in Sun (1993, 2018). There may not be any genuine evidential system in any Formosan language. Zeitoun and Teng (2016) is a reassessment of the position of Kanakanavu and Saaroa among the Formosan languages. Pan (2018) is a sketch grammar of the language in Chinese, and Pan (to appear) is the most up-to-date chapter on a linguistic description of the language in English. Zeitoun and Teng (2022) discuss the word classes of Saaroa and how to teach them effectively.

A sketch of grammar is given in the following sections to facilitate understanding of the texts.

## 2. Phonology

Lha'alua has 13 consonants /p, t, k, ʔ, c, v, s, m, n, ŋ, l, r, l/ and 4 vowels /i, u, ə, a/. The voiceless stops /p, t, k, ʔ/ and affricate /c/ [ts] are all unaspirated. The voiced fricative /v/ is labiodental [v] or bilabial [β], depending on the speaker and phonetic

environment, usually phonetically bilabial before *u*, e.g., /vukuri/ [βukuri] ‘yam’. Older speakers tend to produce the bilabial while younger speakers labiodental. Both /c/ and /s/ are phonetically palatalized before /i/, e.g., *śikuja* ‘muddy’, *civuka* ‘stomach’. The voiced liquid /r/ is a trill and /l/ a flap [r], and /ɿ/ the voiceless lateral fricative [t̪]. The vowel /ə/ is phonetically a high central [i̪].

Lha’alua is one of two Formosan languages that have the voiceless lateral *t̪* in its consonant inventory, the other language being Thao. But it is historically derived from different sources: Lha’alua *t̪* < \*N, e.g., *satumu* < \*DaNum ‘water’, and Thao *t̪* < \*R, e.g., *qałum* < \*qaRum ‘anteater’.

All the consonants occur word-initially and medially, but not word-finally. A free form generally ends with a vowel, occasionally with a nasal, e.g., *kalavuy* ‘cow’. There is no consonant cluster in any position, not even in word-medial. There are a good number of morphophonemic alternations, e.g., *caili* ‘year’, *cait-a* ‘age’, *vuyuʔu* ‘head’, *vuyu=ku* ‘my head’, *amaʔa* ‘father’, *ama=isa* ‘his father’, the word-final echo vowel or ?V being deleted when followed by a suffix or clitic; see Tsuchida (1976: 61–66) for further details. It is useful to set up underlying representations for such morphophonemic forms, in which a word-final consonant is always realized with an echo/supporting vowel (Tsuchida 1976: 61).

The syllable structure is (C)V and the minimal free form is (C)V(C)V (Tsuchida 1976: 61), e.g., *ia* ‘topic marker’, *tutu* ‘testicles’.

Stress falls on the penultimate or antepenultimate syllable. It is not phonemic. Diachronically, PAN \*p > *p*, \*b > *v*, \*t > *t̪*, \*C, \*d > *c*, \*D, \*Z > *s*, \*k, \*g > *k*, \*j > *t̪*, \*q, \*H<sub>2</sub> > *ʔ*, \*s, \*S, \*H<sub>1</sub>, \*w > *ø*, \*-y > *t* or *I* (< \*-ay), \*m > *m*, \*n > *n*, \*ŋ > *y*, \*N, \*n > *t̪*, \*l > *l*, \*r, \*R > *r*, \*a > *a*, \*i > *i*, \*u > *u*, \*ə > *ə*. Note that \* and partial \*-y merged as *t̪*.

### 3. Morphology

Like the other Formosan languages, Lha’alua has two most productive morphological processes, affixation and reduplication. Cliticization is rather common, including all the bound pronouns, =*ami* ‘it is said’, =*cu* ‘change of state’, =*mana* ‘still’, =*na* ‘definite’, =*?ai* ‘perhaps’, etc. Not much compounding has been reported; see Pan (2018: 32).

There are a number of prefixes, two infixes, <*a*> ‘irrealis’, e.g., *m-i<a>ma* ‘will drink’, and <*um* ~ *əm*> ‘actor voice’, e.g., *k<um>ita* ‘to see’, *r<əm>əmək* ‘to plant’, and six suffixes, -*a* ‘indicative, patient voice’, -*ani* ‘locative voice’, -*a* ‘imperative, actor voice’, e.g., *t<um>anji-a!* ‘Cry!’, -*i* ‘imperative, locative voice’, e.g., *vur-i=aku!* ‘Give it to me!’, -*u* ‘imperative, patient voice’, e.g., *aru-pa-ŋitiv-u!* ‘Open the door!’, -*a(na)* ‘locative voice’, e.g., *a-catum-ana* ‘burial location’. There are a couple of

circumfixes, *taa-...-aa* ‘place of’, e.g., *taa-paasin-aa* ‘bathroom’ <*paasin* ‘bathe’, *ta-...-ana* ‘the place to...’, e.g., *ta-aala-ana* ‘the place to take’ <*aala* ‘take’ (Pan 2018: 26). In addition, there are three main types of fossilized infixes, <*al*>, <*ar*>, and <*at*>, e.g., *v<al>u?avu?a* ‘large intestines’, *ma-k<ar>imkimi* ‘salty’, and *ma-v<at>auvau* ‘healthy’. Lha’alua *l* is derived from \**l*, \**r* from \*R or \**r*, *t* from \*N, \**n* or \**j*. See Li and Tsuchida (2009: 354) for further details.

An infix is usually inserted right after the initial consonant in Austronesian languages. In Lha’alua, however, it is inserted after the first CV- or VC- syllable (CV-, VC-, or VCV-), e.g., *m-i<a>ma* ‘will drink’, *um-a-u* ‘will eat’, *ava<a>vu* ‘will cook’.

A prefix may change the syntactic function or category of a form, e.g., *maci?i* ‘to die’, *pa-paci* ‘to kill’, *salia* ‘house’ > *pi-salia* ‘to own a house’.

Lha’alua has very complex morphology. A lexical form may contain a series of affixes and reduplicants. The functions of many prefixes are hard to define, and their order remains to be worked out. There are some fairly productive prefixes, including *ara(a)-* ‘become’, *ari-* ‘do something by hand’, *aru-* ‘remove’, *taku-* ‘remove’, e.g., *ara-taisa* ‘become big, grow’, *m-ari-a-kucu* ‘to comb’, *m-aru-vuju* ‘behead’, *taku-a-cula?ə* ‘remove bone’. See Pan (2018:24-25) for more examples and further details.

There are four main types of reduplication: lexicalized reduplication, total reduplication, partial reduplication, CV- and Ca-reduplications. A reduplicant usually immediately precedes the verb stem. However, occasionally it may follow the verb stem, e.g., *ti-ayat-at-ana* ‘NMLZ-begin-RED-LV, origin’.

Lexicalized reduplication refers to two identical syllables or sequence of syllables that may form a lexical item, e.g., *tautau* ‘a male name’, *saməsamə* ‘pepper’, *tujatujə* ‘Jew’s harp’, but a single syllable or sequence of syllables is ill-formed, \**tau*, \**samə*, \**tuja*. The function of total reduplication for a noun is ‘distributive’, e.g., *aari* ‘day’ > *aari-aari* ‘everyday’.

CV-reduplication indicates plurality of a noun, e.g., *?ukui* ‘goat’ > *?u-?ukui-a* ‘a place with many goats’, repetitive or continuous action of an active verb, e.g., *ru-ruma-anə* ‘RED-inside-LOC, to keep staying inside’, as in (1), intensity of a stative verb, as in (2):

- |     |  |         |                     |
|-----|--|---------|---------------------|
| (1) | “m-a-aru-aru=aku   | na      | <b>ru</b> -ruma-anə |
|     | AV-STA-RED-exist=1SG.NOM   | OBL     | RED-inside-LOC      |
|     | saa-sarə-ana,”   | ami-ami | ka                  |
|     | RED-ground-LOC   | RED-say | NOM                 |
|     |  |         | earthworm           |
|     | “I shall always be underground.” said the earthworm. (Tsuchida, 1-22) <sup>3</sup> |         |                     |

---

<sup>3</sup> Tsuchida, 1-22 indicates that the example is taken from Tsuchida’s Text 1, Sentence No.22.

- (2) m-a-**məɔ**-məɔki=cu=?ai                  ka                  ?ulutii.                  n  
       AV-STA-RED-hopeless=COS=perhaps    NOM                  undergrounder    OBL  
       paa-kari-kari-a=isa                  ka                  m-u-sala=cu                  ka    ɬa?alua.  
       CAUS-RED-talk-PV=3PL.GEN    LNK                  AV-U-leave=COS                  NOM   Saaroa  
       The underground people were quite at a loss what to do. (Tsuchida 2-31)

The main function of Ca-reduplication for verbs is to indicate irrealis, as in (3):

- (3) maaci      m-uu-**la**-likasə=cu      a      tałiaria=na      ia,  
       if            AV-UU-RED-set=COS      NOM      sun=DEF                  TOP  
       ɬi-m-ata-**ka**-kua=cu                  na      uu-**la**-likas-a      tałiaria  
       PFV-AV-begin-RED-face=COS      OBL      AV-RED-set-PV                  sun  
       If the sun sets, it faces towards the place where the sun sets. (Tsuchida, 1-20)

## 4. Syntax

Like most other Formosan languages, Lha’alua is a predominantly verb-initial and head-initial language. The head noun is followed by a modifier without any intervening marker, e.g., *vicuka tapułacəŋə* ‘stomach monkey, the stomach of the monkey’, *tałiaria macici* ‘sun hot, the hot sun’. A relative clause may precede or follow the head noun (Pan 2018: 145-148).

The main verb may cooccur with one or two noun phrases, but rarely three. The third noun phrase usually refers to a location or time.

### 4.1 Case, case markers and linkers

There are three types of case: nominative, genitive and oblique. Case markers are monosyllabic and two forms mark three cases: *(k)a*, which marks both the nominative and the genitive, and *n(a)*, which marks the oblique.

The case markers precede common nouns, pronouns, and personal names. They are all optional.

- (4) maci?i      **(k)a**      tasau.  
       AV.die      NOM      dog  
       The dog died

- (5) um-a-ala      cucu?u      **na**      vutukułu      **na**      ɬuułuŋ.  
       AV-IRR-catch    person    OBL      fish                  OBL      river  
       The person will catch fish at the river

- (6)    **ti-m-ari-vakəsə**                  **ka**              **anjai**              **na**              **mamaini.**  
       PFV-AV-hand.act-beat                  NOM              Anjai              OBL              child  
       Angai beat a child

The marker *ka* may indicate genitive in a non-actor voice construction, as in (7):

- (7)    **sa-anu-a**                  **ka**              **mamaini**    **ka**              **vutukułu.**  
       3SG.GEN-eat-PV                  GEN              child              NOM fish  
       The fish was eaten by a child

The marker *ka* or *a* may also serve as a linker, conjoining two elements, such as head and its modifier, as in (8), verb and its complement, as in (9):

- (8)    **maacu**                  **a**              **səəsəŋə=na**    **ia,**    **m-a-aru**                  **a**              **səəsəŋə**  
       concerning    LNK    grass=DEF    TOP    AV-STA-exist    NOM    grass  
       **a**              **kana?a,**  
       LNK              that  
       As for grass, there is that grass. (Tsuchida 1-18)

- (9)    **m-a-paci**    **ka**              **ku=ami**              **savuļu**              **na**              **taļaria**  
       AV-STA-die LNK    not=said    compensate    OBL    sun  
       It dies because it did not compensate to the sun. (Tsuchida 1-23)

## 4.2 Personal pronouns

There are both free and bound pronouns. There are two sets of free pronouns, neutral and oblique, and there are also two sets of bound pronouns, nominative and genitive. The first person has an extra series of the free form *iłakia* and the bound form *=kia*, as in (13) and (14). It is not clear how it differs from the series of *iłaku*, *=aku* and *=ku*.

Table 1. Personal pronouns

	Free		Bound

na      **iłata**      pa-ara-taisa      minisau.  
OBL 1INCL      CAUS-get-big      so  
How did my mother raise us and make us grow up like that. (Li 1-38)
- (13) m-aɬu-caci-cacili=**kia**      ka      ɬamama=cu      ia,      uka?a=cu  
AV-go-RED-alone=1SG.NOM LNK old=COS      TOP none=COS  
um-upanjə      **iłakia**.  
AV-support      1SG.OBL  
I'm alone and old, with no one to support me. (Li 1-15)
- (14) au-niini=cu=?ai=iau      m-u-lavau=**kia**      ku=**kia**  
like-how=COS=perhaps=wonder      AV-U-end=1SG.NOM      not=1SG.NOM  
a-calia      na      a-ɬua-lava=**kia**      ka      cucu?u.  
IRR-know      OBL      IRR-ŁUA-finish=1SG.GEN      NOM      person  
I don't know how my life will end. (Li 1-13)

Saaroa has a separate set of pronouns, *iłakia*, =*kia* ‘NOM’, and =*kia* ‘GEN’ for the first person, either singular or plural, and it is tricky. It seems to be used for contrastive. Compare (15) a and b:

- (15) a. pa-aɬu-a-saɬi=**aku**.  
CAUS-go-IRR-song=1SG.NOM  
I shall sing.
- b. pa-aɬu-a-saɬi=**kia**.  
CAUS-go-IRR-song=1SG.NOM  
I shall sing by myself.

#### 4.3 Voice, mood, and aspect

Like most other Formosan languages, there is a dichotomy between realis and unrealis in Lha'alu.

There are three voices: Actor-voice, Patient-voice, and Locative-voice. AV is marked by *m-*, *um-* ~ *əm-*, <*um*>~<*əm*>, *u-*, PV by *-a*, and LV by *-ana* in indicative and affirmative sentences. These voice markers have the dual function of indicating voice (AV, PV or LV) and realis. The unrealis marker is the affix *a-* ~ <*a*> or Ca-reduplication in the verb forms.

##### 4.3.1 Actor voice

- (16) um-upaŋə              tilaʔali=ku.  
AV-take.care              body=1SG.GEN  
I take care of my own health. (Li 1-3)
- (17) m-a-aru=cu              iłaku              u-vura              cucuʔu              pa-upaŋə              iłaku  
AV-STA-exist=COS 1SG.NOM AV-give              person              CAUS-raise              1SG.OBL  
I was given to another person to raise me. (Li 3-3)
- (18) aŋali=aku              maini              t<um>aŋula              małələłə              na  
begin=1SG.NOM              small              live<AV>              AV.stay.together              OBL  
ama-ku              ina-ku              himalua              m-u-łakalilí.  
father=1SG.GEN              mother=1SG.GEN              residence              AV-U-Lhakalhilhi  
I have lived with my parents in Lhakalhilhi since I was a little child. (Li 1-1)
- (19) tai-naana=cu              kari=ku.              maacu=aku              m-a-ruriri  
all-that=COS              word=1SG.GEN              when=1SG.NOM              AV-IRR-tell  
t<um>uacu=aku              m-ul-u-a-ləə.  
want<AV>=1SG.NOM              AV-come.out-IRR-tears  
That's all I have to say. When I want to talk about it, I'll shed tears. (Li 1-20)

Table 2. The voice, mood, and aspect system (Pan, to appear)

				AV	PV	LV
Aff	Ind	Realis	Pfv	ti-M-STEM	ti-STEM(-a)	ti-STEM-ana/-ani
		Realis / Irrealis	Prog	(M-) (C)a-RED-STEM	a-RED-STEM(-a)	a-RED-STEM-ana/-ani

		Irrealis		ku a-STEM	ku a-STEM(-a)	ku a-STEM-ana/-ani
	Imp	Polite		kuu=kia (C)a-STEM	—	—

#### 4.3.2 Patient voice

The Patient voice is marked by the suffix *-a*, as in:

- (20) sa-alə-**a**=cu=ami                        ka                        ?arəmə     ka                tapułacəŋə  
       3SG.GEN-hold-PV=COS=said               OBL                       pangolin   NOM        monkey  
       u-pau.    alə-**a**        ka      ?aci=isa,               um-iikua   n                taa-taisini-aa.  
       AV-skin   take-PV        NOM   liver=3SG.GEN   AV-store   OBL        RED-spoon-LOC  
       The pangolin held the monkey with his hands to skin, and took out his liver,  
       and stored it in the spoon basket. (Tsuchida 3-12)
- (21) ɬa,    pu-liuł-**a**        na        vatu?u        ka                civuka        tapułacəŋə.  
       and   PU-change-PV   OBL        stone                        NOM        stomach   monkey  
       And he replaced the stomach of the monkey with a stone. (Tsuchida 3-13)
- (22) maaci=ami        m-u-sala        m-u-laku                        ia,    m-a-aru-aru=ami  
       when=said           AV-U-go        AV-U-draw.water               TOP   AV-STA-RED-exist=said  
       laku-**a**                pasa-ula-ula?ə                        na                vutukułu.  
       draw.water-PV   play-RED-play                        OBL        fish  
       When she went drawing water, she was always at the place of drawing water  
       playing with a fish. (Tsuchida 4-2)

#### 4.3.3 Locative voice

The Locative voice is marked by the suffix *-ana*, as in:

- (23) iłaisa=cu=ami                    ił-aŋał-ał-**ana**=isa  
3PL=COS=said                        NMLZ-begin-RED-LV=3PL.GEN  
a-anə=ta                              cucu?u                    m-aa                    n                    ała-ałap-ana  
IRR-eat=1INCL.GEN                 people                    AV-be                    OBL                    RED-surface-LOC  
saa-sarə-ana=na.                    tainaana=cu.  
RED-ground-LOC=DEF                that's.all=COS  
This is the origin of our food of the people living on the ground. That's all.  
(Tsuchida 2-36)

#### 4.3.4 Irrealis and imperative markers

The irrealis marker is the prefix *a-* or infix *<a>*, indicating a future event, as in:

- (24) um-a-u=aku                        na                        maŋusa.  
AV-IRR-eat=1SG.NOM                OBL                        mango  
I shall eat mango.

- (25) m-i<a>ma                        mapaci                ka                        ḫaamaama.  
AV-drink<IRR>                        wine                        NOM                        old.man  
The old man will drink wine.

There are three different imperative markers: *-a*, *-u* and *-i*, indicating Actor-voice, Patient-voice, and Locative-voice respectively, as in (26b), (27) and (28) respectively:

- (26) a. um-a-ururu=aku                        takəmənə.  
AV-IRR-thread=1SG.NOM                needle  
I shall thread a needle.
- b. a-ururu-**a**!  
IRR-thread-AV.IMP  
Thread a needle!

- (27) a. capa-**u**(=mau)                papa?a                aləməłə. (Pan 2018: 71)  
             roast-PV.IMP(=wish)        meat                boar  
             (Please) roast the boar meat!

- b. kitu-**u**=mau<sup>4</sup>  
             look-PV.IMP=wish  
             Please look!

- (28)      vur-**i**-aku.  
             give-LV.IMP=1SG.NOM  
             Give it to me!

#### 4.3.5 Aspect markers

Full reduplication, CVCV- without coda, indicates ‘continuous’, as in (29) and (30), Ca- reduplication indicates ‘irrealis’, as in (31) and (32), and CV- reduplication indicates ‘progressive’, as in (33)-(36). When expressing present and future progressive, irrealis and progressive have to co-occur, such as *t<um>a-tuu-tuhucu* in (36).

- (29) **k**<um>**ita**-kita                na                iłałamu=na.  
             RED<AV>-look                OBL                1EXCL=DEF  
             (You) keep looking at us.

- (30) taku-liacə                a                tiki=ku                pa-**cəpə**-cəpəñə                na  
             TAKU-bad                NOM                heart=1SG.GEN        PA-RED-think                OBL  
             li-ałumia=ku.  
             NMLZ-experience=1SG.GEN  
             I feel bad in my heart when I keep thinking of my past experience. (Li 1-4)

- (31) **t**<um>**a**-tajii                a                mamaini.  
             RED<AV>-cry                NOM                child  
             The child will cry.

- (32) uka?a=cu                li-palava        pa-**cəpə**-cəpəñə        uka?a=cu        um-a-upañə  
             none=COS                PFV-rely                PA-RED-think        none=COS        AV-RED-support  
             When I think of it, I've got no one to rely on and no one to support me.

---

<sup>4</sup> The verb root is *kita* ending with *a*, which is assimilated to the vowel of the following imperative marker *-u*. This is lexically conditioned.

- (33) um-**au**-a-u=aku=mana                                    tavələvələ.  
       AV-RED-IRR-eat=1SG.NOM=still                            banana  
       I am still eating banana. (Pan 2018: 78)
- (34) taku-a-**li**-**li**-liuŋu                                    a                        mamaini=na                    tamu=isa.  
       TAKU-IRR-RED-RED-visit                            NOM                child=DEF                    grandparent=3.GEN  
       The children are visiting their grandparents. (Pan 2012: 197)
- (35) t<um>aliki=ami                                    ka                        ɬa?alua                    na                        ?uuŋu,                    ki-**tuu**-turu  
       plait<AV>=said                                    NOM                Saaroa                    OBL                horn                    KI-RED-imitate  
       na    hasiŋu<sup>5</sup>=na.  
       OBL    ladder=DEF  
       The Saaroans plaited horns, imitating a ladder. (Tsuchida 2-3)
- (36) maaci=kia    t<um>imaɬa                    na                        kari=a,                            vaivi?i  
       when=1SG.NOM    hear<AV>                    OBL                        talk=DEF                            Paiwan  
       ka    t<um>**a-tuu**-tułucu                    savuanə                    amiłaa.  
       LNK    RED<AV>-RED-fish.poison                    drug                    say  
       I have heard people say that it is the Paiwans who always fish by poison.  
       (Tsuchida 20-17)

The prefix *li-* is the perfective marker, as in (37):

- (37) **ti**-k<um>ita                                mamaini                    na                        tasau.  
       PFV-see<AV>                                child                            OBL                        dog  
       The child saw a dog.

The clitic *=cu* indicates change of state, as in (38):

- (38) ku=**cu**                                a-taŋii                    a                        mamaini.  
       not=COS                                    IRR-cry                    NOM                child  
       The child is no longer crying.

---

<sup>5</sup> It is a loanword from Japanese はしご ‘ladder’.

---

<sup>26</sup> In their traditional belief, the sun is the wife and the moon is the husband.

<sup>27</sup> the form *nai* is unusual compared to *?ai*.

## Text 2. The underground people

?ulutii

SarText 2-1

Note: Sar II-172-174

Tape: 65-132

- (1) maacu        ka        a-całii=ku        n        kiariari        ia,  
concerning    NOM    A-know=1SG.GEN    OBL    ancient        TOP  
m-u-sala=ami    k<um>ali    n        tałivakurałai    n        lika?a    Łakuruca.  
AV-U-go=said    dig<AV>    OBL    yam        OBL    down    Lhiukuwei  
As for what I know about the ancient times, (Saaroa people) went down to  
Liukuwei to dig yams.
- (2) ki-la-luiłi=ami        n        ?ulutii.  
KI-RED-dig.through=said    OBL    underground.world  
They dug through to the underground world.
- (3) t<um>aliki=ami        ka        ła?alua        na        ?uuju,    ki-tuu-turu  
plait<AV>=said        NOM    Saaroa        OBL    horn        KI-RED-imitate  
na        hasiju<sup>28</sup>=na.  
OBL    ladder=DEF  
The Saaroans plaited horns, imitating a ladder.
- (4) a-pata-łaasø        a-puu-capi        n        ?ulutii,  
IRR-hang-down    IRR-PUU-drop    OBL    underground.world  
u-a-ləvə-a=isa=ami        m-ału-kua        (na)    ?ulutii.  
U-IRR-go.along-LV=3PL.GEN=said    AV-go-move    OBL    underground.world  
They hung it down to the underground world, along which they went to the  
underground world.
- (5) mə-ləvi=cu        isana=ami        rumałəø        m-uu-capi        n  
AV-go.along=COS    3SG.OBL=said        then        AV-UU-go.down    OBL  
?ulutii.  
underground.world  
They went along it, then descended at the underground world.

---

<sup>28</sup> It is a loanword from Japanese はしご ‘ladder’.

- (6) “au-naani=iau                  ka            cucuʔu    naani,”        ami-ami         ka

## Appendix: Saaroa Songs, including *miatungusu*

Paul Jen-kuei Li

### 1. Introduction

The most important Saaroa traditional ritual ceremony is *miatungusu*, as described in Text 7 by Tung, Text 12 by Tsuchida, and Text 3 by Ting in this volume. It is held every other year now. The Saaroa people dance and sing for three to seven days and nights. The complete set of songs was recorded and made in a CD by the government of Kaohsiung, entitled: *Hla’alua and Kanakanavu Folksongs* 南鄒族民歌. The songs were recorded again by the professional ethno-musician, Professor Rong-shun Wu 吳榮順, with musical notes, and the words were transcribed by Paul Li, with a CD and a pamphlet written in Chinese, issued by the Wind Records in Taipei in 2001. The songs were then discussed and published in Chinese in a paper by Li (2006). In section 3, nineteen of all the twenty-one recorded songs are included. Song 5 is left out because it shows a fixed pattern of counting people from one to ten, and not very interesting. Song 11 is also left out because Saaroa people do not know any of the words, although they can still memorize and sing the song.

Many words in the traditional songs are obsolete and unintelligible even to native Saaroa speakers, such as 3.11, which is left out in the appendix. Sometimes different speakers may give different interpretations for the same words.

I often encountered serious problems when I tried to translate the words of traditional songs, which may be different from daily language spoken by the natives. Even the native speakers may not know what some of the words mean, or they may not know how to explain them clearly. Words of ritual songs are usually much more difficult than those of non-ritual song to comprehend. Ritual songs, which can only be performed during a ceremony at a particular period of time, are more likely inherited and passed down through successive generations of an ethnic group. Speakers often do not know what the obsolete words mean. These songs are not up to be borrowed. On the other hand, non-ritual songs may be borrowed or influenced by the surrounding people, genetically related or unrelated. Singers of non-ritual songs may vary the words they sing from time to time.

There are metaphoric expressions or figurative speech. For example, the words “gourd”, “pomelo”, and “papaya” all refer to female breasts in a Saaroa traditional song (see 3.16 below). It is hard to come to grips with the problem without a good knowledge of the cultural background. Translators often lack such a background. It varies from language to language if a language has rich metaphorical expressions. Saaroa, for example, is rich with metaphorical expressions in traditional songs. I have to add grammatical notes when I come across such a case.

## 2. Interesting expressions in the traditional folk songs of Saaroa

Saaroa has some uncommon expressions, such as:

- (1) a-uka-uka=cu                ka                caliŋa=ku.  
AV-RED-forget=COS      NOM                ear=1SG.GEN  
My ear forgot (= I have forgotten).

Metaphorical expressions often appear in Saaroa traditional songs. For instance, the line below says that “It is hot in my stomach” on the surface, while the hidden meaning is “I have a broken heart”, as in (2):

- (2) masiamə                civuka=ku  
hot                        stomach=1SG.GEN  
It is hot in my stomach. = I have a broken heart.

A girl who was disappointed in a love affair cried too much, so that she could hardly see well. Yet she would tell a lie to other people that her eyes got hurt by cogon-grass, as in (3):

- (3) t<um>u-vuļa-vuļa                i                tupi?i                na                ?erəla  
TU<AV>-RED-blur                ?     get.blind                OBL                cogon.grass  
My vision is much blurred because my eyes got hurt by cogon-grass.

In the same song, the other people tried to console her and tell her that it may be annoying to have a husband and that she may not really want one, as in (4):

- (4) misa?inta                sumanə                i                pataļi                ruca-rucakə  
not.want                        spouse                        ?                        nuisance                RED-angry  
(I) do not want a husband because he is annoying and irritable.

These are interesting instances of the subtle descriptions of a young girl’s mind.

The lines below say that a young man likes to hide under a tree and to try to shoot a bird with the tender root of a plant, which is not powerful enough to hit the head of the bird. This implies that he is too young to get married. The word *ripase* ‘bullet’ implies ‘testicles’.<sup>47</sup> Several terms in the line are used metaphorically. No vulgar language is used.

---

<sup>47</sup> It is understandable that the term *ripase* ‘bullet’ implies ‘testicles’. Another term *aļu* ‘honeybee’ also implies ‘testicles’ in another song, as in:  
*tulisua kana mulikapə aļu*  
deserve that steal bee  
They deserve stealing the sacrifice (honeybee).

- (5) ɬa-m-ulu-aili=aku                        kuvavani    na                      ɬuɬuļaŋø,  
   ŁA-AV-ULU-want=1SG.NOM                eat                   OBL                   plant.name  
   ?icøvørø                       mana               vuju               ripasø=isa.  
   tender.root                       as                   head                   bullet=3.GEN  
   ku=pa-sikøra                       na               vuju                   tamulumula.  
   not=CAUS-achieve               OBL               head                   type.of.bird  
   I'd like to hide under a tree to shoot a bird with the tender root of a plant as  
   a bullet. But it is not powerful enough to catch the bird.

In another Saaroa song the singers use the term *tałuku* ‘bottle gourd’, *tapaŋia* ‘papaya’, and *vaakø* ‘pomelo’ to refer to female ‘breasts’. Both a bottle gourd and pomelo look smooth and lovely on the surface, and these are the terms used by a female singer, while a papaya may look rough on the surface, and that is the term used by a male singer who mocks at a girl, as in (6) and (7):

*The girl sings :*

- (6)a. pasakulaia=mau    m-atı-alu        tałuku               maraucu?ai  
       hurry=wish           AV-ATI-take        gourd               hurry  
       taturu=isa.  
       younger.sister=3.GEN  
       I hope he will come soon to take his younger sister's gourd (= breasts).
- b. k<um>ita    na                ?ususu=isa        taina-ni               taina        vaakø.  
       look<AV>    OBL               breast=3.GEN        big-NI                big               pomelo  
       (You can) see her breasts bigger than pomelos.

*The boy sings :*

- (7) tapaŋia?a    luva-njana                luva-tiŋa-tiŋala.  
       papaya           LUVA-uneven        LUVA-RED-rough  
       (Your breasts) are as rough as a papaya.

Sometimes it may take a little imagination to realize the hidden meaning of a song, as in (8):

(8)	calai=kia=isa=mau	kua-vuŋavuŋa	na	vuvuŋa=na.
	pity=1SG=3.GEN=wish	KUA-flower.name	OBL	flower=DEF
	murakici	m-ia-mələ	na	m-a-cici
	plant.sp.	AV-IA-wither	OBL	AV-STA-hot
				LNK sun

Please have pity on me, a flower. It withers in the hot sun

In the song in (8), the girl considers herself a type of flower, which blooms at night but withers in daylight. She was very pretty. Unfortunately, she married lazybones. She was ruined just like a pretty flower which withered in the hot sun.

Saaroa speakers do not know what the words mean in many ritual songs. They may give different interpretations for some of the words. We usually follow the older speakers, while treat younger speakers' interpretations in footnotes.

Vocabulary in traditional songs may differ from that in ordinary daily language.

For example,

(9)	<b>Traditional</b>	<b>Ordinary</b>	<b>Gloss</b>
	iłavəesa	suamujumuŋa	'drizzle'
	taruraməə	tałak	'domesticated pig'
	ħiarusiħamu	ħikitalia	'hemp fiber string'

Similarly, Saaroa people use special hunting terms for wild animals, different from the ordinary daily language, perhaps due to taboo. Compare the differences between the special hunting terms and ordinary terms in Saaroa language below:

(10)	<b>Hunting terms</b>	<b>Ordinary terms</b>	<b>Gloss</b>
1)	ħatakəmənə	tauruŋu	muntjac 山羌
2)	ħatikasə	vutuļu	deer 山鹿
3)	apiħlupaħupai	tapuħacəngə	monkey 猴
4)	kuvukuvura	?arəmə	pangolin 穿山甲
5)	ħamilanjica	takaukau	hawk 老鷹
6)	ħimakaħiuməra	aləmələ	boar 山豬
7)	kəŋkəŋramucu	?ukui	goat 山羊
8)	ħavuruvuru	lukuļu	leopard 豹
9)	ħasəməsəma	cumi?i	bear 熊

Not only vocabulary, but also grammatical terms may differ between traditional songs and ordinary language. For instance, slightly different forms of personal pronouns are used in traditional songs and ordinary language, as shown below:

(11)	<b>Traditional songs</b>	<b>Ordinary</b>	<b>Gloss</b>
	imu	=mu	‘second person, plural, nominative’
	ɬaita, =tai	=ita	‘first person, plural, inclusive, nominative’
	kiaisa	na iłaku	‘first person, singular, oblique’

More careful comparison between the language used in traditional songs and that in ordinary language in Saaroa may reveal even more interesting differences between the two.

### 3. Songs

#### Song 1. Dye yam

likili

[1]

- (1) i likili, likili iui, i lavaļi<sup>48</sup>, lavaļi.  
? dye.yam dye.yam ? ? plant.sp. plant.sp.  
dye yam, dye yam, *Asplenium antiquum* Makino, *Asplenium antiquum* Makino.
- (2) ina muli vəŋəeli<sup>49</sup> iui mulilaleə vuai.  
? leaves tree.sp. ? grow ?  
The plant (to make a pestle) dropped its leaves and is growing again.
- (3) ina ma-taru taruuļu iui m-a-talaləə vuai.  
? AV-take carry ? AV-STA-wither ?  
(The mothers) brought (their) children by carrying them on back and (waited for the hunters) below the withered plant.
- (4) ina li-sapota<sup>50</sup>, vinau<sup>51</sup> i sa-rama-rukaruka.  
? PFV-gain.nothing tree.sp. ? 3PL.GEN-RAMA-lost  
(The hunters) caught no game and they were lost at the divine plant (for fortune-telling).
- (5) ina vəŋa-vəŋa viļuua<sup>52</sup> i ku=pa=taraļapəə<sup>53</sup>  
? RED-blossom tree.sp. ? not=CAUS-see  
The plant is blossoming (with yellow flowers), and don't let it be seen.
- (6) ku=pa=taraļapəə k<um>iakui iaiai.  
not=CAUS-see ? ?  
Don't let it be seen. (The blossoming is a warning of the approaching enemies.)

<sup>48</sup> *lavati* 'plant sp.', *Asplenium antiquum* Makino, a type of wild vegetable, used to protect human life during a ritual ceremony.

<sup>49</sup> *vəŋəeli* 'plant sp.', hard wood, used to make a pestle.

<sup>50</sup> *tisapota*, informant Eleke Lhauracana (age 75) interpreted it as 'having no game'; informant Amalanamał Salapuana (age 50) interpreted it as 'holding, pressing down'.

<sup>51</sup> *vinau* 'plant sp.', informant Eleke Lhauracana interpreted as 'men use it for fortune-telling'; informant Amalanamał Salapuana interpreted it as 'wood used to start a fire in a mountain'.

<sup>52</sup> *viļuua* 'plant sp.', informant Eleke Lhauracana interpreted as 'its bark is used to make string or a basket to carry on back.'; informant Amalanamał Salapuana interpreted it as 'having yellow flowers, warning the approach of enemies while blossoming'.

<sup>53</sup> *kupataralapəə*, informant Eleke Lhauracana interpreted as 'don't let it be seen'; informant Amalanamał Salapuana interpreted it as 'don't cut it'.

[2]

- (1) ɬamatakupuɬainaia<sup>54</sup> inacaliŋana ałupu ia,  
place.name intrude hunting.area TOP  
We intruded into other people's hunting territory.
- (2) anikialikiła patulu, patulu pavau, pavau palilivauvau  
start celebrate celebrate wait wait ?  
We started celebrating and waiting.

[3]

- (1) nasicui, ruma-ɬareə ruma-iłavəəsa<sup>55</sup>.  
go.to.mountain RUMA-return RUMA-drizzle  
(They) went to the mountains. It was drizzling while they returned.
- (2) iłavəəsa im-iravusa vulała.  
drizzle IM-drizzle moon  
It was drizzling, and there was moonlight.
- (3) vulała ui ɬaluma-lumai.  
moon ? dog.name  
There was the moon when the barking of the dog was heard.
- (4) ɬaluma-lumai hi-m-ału-lailai ?ampulai laita iaiaai.  
dog.name PFV-AV-go-? grow.big limit ?  
(The dog) grew very tall.

[4]

- (1) kisuałalau kai ɬacupuana takuarau rauvaku  
? LNK ? search companion  
um-a-ala na ɬumanə tamani.  
AV-IRR-take OBL iron spearhead  
(The chief visited every family) looking for a companion to go and take an iron spearhead.

---

<sup>54</sup> *tamatakupuhlainaia* is the name of a place, and we intruded into other people's hunting territory and felt exciting.

<sup>55</sup> *iłavəəsa* 'drizzle' is an obsolete word, and *suamungumunga* is a modern term.

[5]

- (1) nasicui paskialəø m-u-al-alaina culvanə, uiiaiia  
already before AV-U-RED-female evening interjections  
łakərəmaia ipalai.  
? ?

You made an appointment with a girl to meet with her on that evening, ah! yet you did not go. (Then forgot it!)

[6]

- (1) nasicui patuali=ku, patanika?ulu, hatamula?alavau, micau.  
already cook=1SG.GEN regrettably leave fine  
micau mihai mikama ?ałani mihai.  
fine ten.day ? return ten.day

I prepared to cook (food). Regrettably (the guests) left. It is alright.  
It is alright. (I hope) they will return in ten days.

### Song 2. Preparation song malalalaŋə

[1]

- (1) uau m-al-al-alaj̃ ku=pil-alaj̃ s<um>ałikai=u  
? AV-RED-RED-prepare not=?-prepare all.ready<AV>=2SG.NOM  
sikianaku? kiniu pasa-manəj̃ m-al-al-alaj̃, tal-aili<sup>56</sup>  
things ? PASA-focus AV-RED-RED-prepare TAL-back  
łapalai, ?amata rali-rali<sup>57</sup> ai aku.  
girl.friend don't RED-ruin ? ?

Be well prepared with all you need for the ritual ceremony. Are you all ready?  
Concentrate in your preparation. Concentrate, and do not think about your girl friend. Don't ruin the ritual ceremony.

<sup>56</sup> *talaili* ‘don’t get distracted’, informant Eleke Lhauracana interpreted as ‘look back’; informant Amalanamał Salapuana interpreted it as ‘don’t get distracted’.

<sup>57</sup> *ratirali* ‘ruin’, informant Eleke Lhauracana interpreted as ‘associate chief’; informant Amalanamał Salapuana interpreted it as ‘ruin’.

[2]

- (1) capali      capali      cœlæk      cœlæk,      capali      capali  
 strengthen      strengthen      power      power      strengthen      strengthen  
 cœlæk      cœlæk.  
 power      power  
 (When the men dance in a circle and sing, they wish to) strengthen their power  
 (in order to drive away the evil spirits).

[3]

- (1) taruramœ<sup>58</sup>      ḥasəŋ<sup>59</sup>      haia,      m-u-ɳała-ɳała      aiu  
 pig      holy.shell ?      AV-U-RED-again ?  
 taruramœ<sup>58</sup>      ḥasəŋ      haia,      m-u-ɳała-ɳala.  
 pig      holy.shell ?      AV-U-RED-again  
 (We offer you) a pig as sacrifice, (and hope) you will return (next year).
- (2) takiarø      ḥasəŋ      haia,      m-u-ɳała-ɳała      aiu.  
 originate      place.name ?      AV-U-RED-again ?  
 takiarø      ḥasəŋ      haia,      m-u-ɳała-ɳala.

 place.name      not=PI-have      plant.sp. ?  
 (We Lha’alua people) originated from Lhaseng, even though there is no *kuara*  
 (to cleanse the holy shells).

---

<sup>58</sup> *taruramœ* ‘pig’ is an obsolete word; *tatake* ‘pig’ is a modern term, and *aləmətə* ‘wild pig’ is also a modern term. *vavutu* ‘wild pig’ is used for hunting.

<sup>59</sup> *ḥasəŋ* ‘the residence of holy shells’, it indicates the holy shells.

<sup>60</sup> *kuara* ‘plant.sp.’, used to brew wine. During the ritual ceremony, it is used to wash holy shell and protects soldiers.

### Song 3. Prepared *lavati*

tiālu lavači

[1]

- (1) aru-sili<sup>61</sup> siili?in samiaku takupili aiu.  
take-daytime sacrifice ? bowl ?  
(We) get the bowls for the ceremony in the daytime.
- (2) aru-sili pañicui hiarusihluamu<sup>62</sup> aiu.  
take-daytime pork hemp.fiber ?  
(We) get the pork and hemp fiber for the ceremony in the daytime.
- (3) aru-sili pañicui ti-alu-lava=limu aiu.  
take-daytime pork IRR-ALU-finish=1EXCL.GEN ?  
(When we) get the pork for the ceremony in the daytime, we are ready.
- (4) aru-sili pañicui lililiqusuļa aiu.  
take-daytime pork drive.away.evil.spirits ?  
(When we) get the pork for the ceremony in the daytime, it is ready (for us to start) driving away evil spirits.
- (5) ari-pułalau kai tula-tulalauļa aiu.  
ARI-gather LNK RED-pregnant.woman ?  
(The chief) gathered (all the people to dance and sing) together, (but not any) pregnant woman.
- (6) m-u-a-paca lavai manacama kuanaana aiu.  
AV-U-IRR-invite friend ? ? ?  
Friends (from other villages) are invited (to join dancing and singing).

<sup>61</sup> *aru-sili* ‘to take it in daytime’, cf. *sili-ané* ‘daytime’, and *um-aala* ‘take’.

<sup>62</sup> *hiarusihluamu* ‘hemp fiber’, used to form a circle during the ritual ceremony, cf. *?urayø* ‘hemp’, *tausu* ‘Boehmeria densiflora Hook. et Arn.’, and *likitalia* ‘rope’. The song has different term.

### **Song 4. Dance**

miatujusu

[1]

- (1) m-i-tuŋu      m-i-tuŋu      raikucuia-ləpəŋə      aiu.  
     AV-I-dance      AV-I-dance      never-finish      ?  
     Dance, dance, and never stop.
- (2) rari      tua-mapaci      kita      na      kə-tənəmə      aiu.  
     diligent      brew-wine      look      OBL      ?-sea      ?  
     (We) worked hard brewing a lot of wine, and it looked like a sea of wine.
- (3) kita      na      kə-tənəmə      kucu      patakusalı      aiu.  
     look      OBL      ?-sea      together      ?      ?  
     It looked like a sea of wine.
- (4) calu      camamanəŋ      calu      ?ala?alasu      aiu.  
     ?      ?      ?      ?      ?  
     ?

[2]

- (1) kucu      ra-ruvanə      kucu      ?a-t<um>ałaaø      aiu.  
     together      RED-evening      together      not-many.people<AV>      ?  
     Not many people were at the ceremony at night.
- (2) aruai      vavaø      kia-cili      m-ari-pəsərə      aiu.  
     Aruai      rib      KIA-alone      AV-carry-kidneys      ?  
     Aruai wished to get the ribs and kidneys by herself.
- (3) kia-cili      m-ari-pəsərə      ku=pari-a-pəsərə      aiu.  
     KIA-alone      AV-carry-kidneys      not=carry-IRR-kidneys      ?  
     She wished to get the kidneys by herself, but she could not get them.
- (4) vali-hulalaļuŋ      vali-valiutai      aiu.  
     VALI-resist      VALI-replace      ?  
     (Older people) would dance no more, (younger people) continued instead.

[3]

- (1) ḫatałakəcan m-arinu m-u-su-rauvu aiu.  
place.name AV-modest AV-U-SU-dance ?

People from Lhatalhakecan were too polite to dance with them.

- (2) m-arinu m-u-su-rauvu maca-macaciјała aiu.  
AV-modest AV-U-SU-dance RED-gossip ?

They were too polite to dance with them, and (the dancers) complained.

[4]

- (1) aripəla<sup>63</sup> rautai tauruŋə ?amuliana<sup>64</sup> aiu.  
bamboo.flute drive muntjac mountain.name ?

Play the bamboo flute to attract muntjacs to come over from 'Amulhiana.

[5]

- (1) ?arikura rautai tauruŋə ravaravau aiu.  
surround drive muntjac place.name ?

Besiege muntjacs and drive them to Ravaravau.

- (2) m-u-su-lava-lava-cui ɬa?alu mi-a-tuŋusu aiu.  
AV-U-SU-RED-end-? Saaroa AV-A-rite ?

Our Saaroa ritual ceremony will end.

**Song 6. It serves you right. We have stolen the holy shells.<sup>65</sup>**

tulisua kana mulikapə aļuu

[1]

- (1) tulisua kana m-u-likapə aļuu<sup>66</sup>  
deserve that AV-U-steal shell

It serves you right. We have stolen the holy shells.

- (2) ausi=mana m-i-a-ŋała mitu  
like=still AV-I-IRR-again miatuŋusu

Shall we still dance in a circle performing the ritual ceremony?

<sup>63</sup> *aripəla* ‘bamboo flute’, used to imitate the sounds of muntjac.

<sup>64</sup> *?amuliana* ‘name of the mountain’, it is a place full of muntjacs.

<sup>65</sup> As mentioned in Section 1, Song 5 has a fixed pattern of counting people from one to ten. It is not very interesting, so it is left out.

<sup>66</sup> *aļuu*, informant Eleke Lhauracana interpreted it as ‘bee, implying testicles’ and it requires further research to understand the explanation; informant Amalanamał Salapuana interpreted it as ‘shell’, the shells used for *miatungsu*.

- (3) aru-sati-u=tai<sup>67</sup>                  ka            sati           talajæ=tæ.  
 ARU-sing-?=1INCL.NOM    OBL         song        protect.against.demon=1INCL.GEN  
 Let's sing the ritual songs and hope that the holy shells will guard us against evil.

**Song 7. Love song for men and women<sup>68</sup>**  
 tałuku mai

- (1) tałuku<sup>69</sup>,      tałuku                mai<sup>70</sup>.  
 scoop                scoop                small  
 Boy: Girls, you're too young to have fun with us.
- (2) ku=mai,      ku=mai,      ipala.  
 not=small      not=small      full.and.round  
 Girl: Even though small, we're well-developed
- (3) ipala,                ipala=isa.  
 full.and.round      full.and.round=3.GEN  
 Boy: They believe they are full-developed.
- (4) laisa,                laisa=kia!  
 come                come=please  
 Girl: Come on! Come on!
- (5) sakia,                sakia                lalu.  
 sooner.or.later      sooner.or.later      ?  
 Boy: Sooner or later, sooner or later.
- (6) alalu,                alalu=kia.  
 let.it.be                let.it.be=1please  
 Girl: Let it be! Let it be!

---

<sup>67</sup> *tai*, '1INCL.NOM', the modern personal pronouns in Saaroa for the first person nominative inclusive is =*ita* and for the first person genitive inclusive is =*ta*. In the text, it writes *tai*, and the function of *i* is unknown. It may be the metathesis of *i*: =*ita* > =*tai*.

<sup>68</sup> This is a male and female love song sung in the style of anadiplosis, which repeats the last word in one phrase at the beginning of the next.

<sup>69</sup> The form *tałuku* means 'scoop', which implies 'vulva'.

<sup>70</sup> The first sentence sung by *Vilanganu* is:  
 kalatiu?anane tiuku, tiuku mai.  
 vulva                still        still        small

- (7) lukia,                lukia                patanə.  
      in.that.case        in.that.case        chaste  
      Boy: In that case, be chaste
- (8) patanə,                patanə                viki<sup>71</sup>.  
      chaste                chaste                lily  
      Girls: Chastity, chastity, (we're as chase as) lilies.
- (9) nav-iki                nav-kinula.  
      NAV-lily                NAV-do.not.forget  
      Boy: (Chaste) like lilies, keep it in mind.
- (10) kinula                kinu-vasanəø.  
      do.not.forget                KINU-oath  
      Girl: (We'll) keep our oaths in mind.
- (11) vasanəø,                vasanaøø                piupiu                tamaaka                kari-a.  
      oath                oath                sing                until.now                word-PV  
      kuripaspasø                kərkərau<sup>72</sup>.  
      drop                banana.flower  
      Chorus: Oath, oath, sing songs, until now. The banana flowers dropped.

---

<sup>71</sup> While *viki* ‘lily’ is an obsolete word, *tavacili* ‘lily’ is a modern term.

<sup>72</sup> *kərkərau* ‘banana.flower’ is the form from *Paiciana*, and the form from *Vilanganu*, Gao Jhong Village, is *tavələvəla*.

## Song 8. You men's aprons

tapisimu

[1]

- (1) tapisi=mu,              tapisi=mu              liturapura<sup>73</sup>              ai.  
     apron=2PL.GEN          apron=2PL.GEN          cloth.with.a.wrinkled.pattern ?  
     Women: Your male apron, your male apron, wrinkled and ugly.
- (2) ?aluļi=mu,              ?aluļi=mu              li-ma-tararu              ai.  
     female.skirt=2PL.GEN    female.skirt=2PL.GEN    PFV-AV-wear.fancy.clothes ?  
     Men: Your female apron, your female apron, reaching the knees and pretty.
- (3) m-ali-?aļku,              m-ali-?aļku              li-ma-?ukui              ai.  
     AV-ALI-ugly              AV-ALI-ugly              PFV-AV-wear.goat.leather ?  
     Women: Ugly, ugly, in goat leather (your wear).
- (4) m-ali-?a-salaņsaļ        ?aļeņjan=ku              li-ma-lukuļu              ai.  
     AV-ALI-?A-handsome      ?aļeņjan=1SG.GEN    PFV-AV-wear.leopard.leather ?  
     Men: My son 'Elengan is handsome in his leopard leather coat.
- (5) misamisa?inta              na              panavai              ?ara-a-puli<sup>74</sup>              ai.  
     don't.want              OBL              Panavai              become-IRR-white ?  
     Women: We don't like a lazy bones like Panavai with a white face.
- (6) ?iliči=mu,              ?iliči=mu              līmpakau              ai.  
     name=2.NOM              name=2.NOM              fat              ?  
     Men: We don't like a stout woman like 'iliči.
- (7) misamisa?inta              i              lātuaj              ?ara-a-puli              ai.  
     don't.want              ?              Lhatuang              become-IRR-white ?  
     Women: We don't like a lazy bones like Lhatuang with a white face.
- (8) m-a-lia-salau<sup>75</sup>        ka              li-m-a-avu<sup>76</sup>              ?arisapēta              ai.  
     AV-STA-LIA-unfit      LNK              PFV-AV-IRR-pull.up    belt              ?  
     Men: A pregnant woman wears her belt above her big belly.

---

<sup>73</sup> Saaroa *liturapura* ‘cloth with a wrinkled pattern’ is borrowed from Kanakanavu *liturapura*.

<sup>74</sup> Saaroa *?araaputi* ‘become white’ < *puti*, cf. *maaputi* ‘white’.

<sup>75</sup> Saaroa *mali-a-salau* ‘unfit’ as not good looking as pregnant women, cf. *takuliacə* ‘ugly’, *paliali* ‘pregnant’.

<sup>76</sup> Saaroa *līmaavu* ‘wear it too high’ < *-avu* ‘high’, cf. *?ivavu* ‘upward, high.’

- (9) m-a-siamə civuka=ku<sup>77</sup> pu-acurunu na ?in-tapuał  
 AV-STA-hot belly=1SG.GEN PU-see.off OBL ?IN-cross.mountain  
 na ?ałavitija ai.  
 OBL ?ałhavitinga ?

Women: I feel bad when I see my boy friend leaving for Mountain ‘Alhavitinga.

### Song 9. Song for departing varatəvatə

[1]

- (1) varatə-vatə, varatə-vatə-i=mu. m-a-ra?ia łaita<sup>78</sup>, łaita.  
 wind-? wind-?-IMP=2PL.NOM AV-IRR-separate 1INCL 1INCL  
 You’re fast like the wind. Let’s keep separate.
- (2) m-uru-iałə, m-uru-iałə-i=mu.  
 AV-URU-divide.into.two.sides AV-URU-divide.into.two.sides-IMP=2PL.NOM  
 m-a-ra?ia łaita, łaita.  
 AV-IRR-separate 1INCL 1INCL  
 Let’s keep separate. You dance over there, while we dance here.
- (3) səsəra<sup>79</sup>, səsəra=i=mu. m-a-ra?ia łaita, łaita.  
 make.a.circle make.a.circle=IMP=2PL.NOM AV-IRR-separate 1INCL 1INCL  
 You dance in a circle, let’s dance separately.
- (4) nucanuca n<um>akita kiłakiła  
 pair hand.in.hand.and.raise<AV> male.name  
 akiva?atə kiviili kiłakiła.  
 put.hands.on.one's.shoulders ? male.name  
 Each dancer has a partner, holding hand by hand high while dancing in a circle,  
 and holding the shoulder in the front.

---

<sup>77</sup>The form *civuka* means ‘belly’, which implies ‘incenter’. *masiamə* means ‘hot’, which implies ‘unwell’.

<sup>78</sup> The common form is *iłata* ‘1INCL’, while it is *łaita* here.

<sup>79</sup> Men in a row, and women in a row. They dance in circles, and switch positions.

[2]

- (1) kia-uliuli<sup>80</sup> tana lisu?ilicu<sup>81</sup>, kia-uliuli tana lisu?ilicu.  
 KIA-rattan.sp. take Lisu'ilhicu KIA-rattan.sp. take Lisu'ilhicu  
 (We) shall gather vine at Lisu'ilhicu to decorate our heads.
- (2) kiasa paruraitana<sup>82</sup> turuŋutuŋu kiasa paruraitana turuŋutuŋu  
 pick orchid Turungutungu pick orchid Turungutungu  
 turuŋutuŋu  
 Turungutungu  
 (We) shall go and pick orchid plant at Turungutungu (to plant it at the gathering house).

[3]

- (1) anumita ɬavili kiłakiła sipai?a ?umuta  
 there.is.a.man leaf male.name make rice.dumpling  
 kiłakiła, kiłakiła.  
 male.name male.name  
 A man named Kilhakilha will go to the mountain to gather leaves to make rice balls.
- (2) anumita ɬa?umu kiłakiła sipa?ila uculucu  
 there.is.a.man rice.ball male.name catch bee  
 kiłakiła kiłakiła.  
 male.name male.name  
 Kilhakilha will take the rice balls to catch honeybees.
- (3) anumita uculucu kiłakiła kiatarasəkəpə navuŋu mita  
 there.is.a.man bee male.name worship head.hunt ?  
 navuŋu mita.  
 head.hunt ?  
 Kilhakilha will catch honeybees and return to the ritual ceremony, then he will go head-hunting.

---

<sup>80</sup> *kiauliuli* ‘rattan.sp.’ is about one meter long and grows on a tree. Women use it as a headdress garland during the ritual ceremony.

<sup>81</sup> *lisu?ilicu* ‘deep water, ghost bathing place’, Above the Tian Chi, there are many big trees, flowers and beautiful scenery.

<sup>82</sup> *paruraitana* ‘orchid.sp.’, used to avoid evil spirits, and it is planted at the top of the assembly room during ritual ceremony.

## Song 10. Happy song<sup>83</sup>

aiana

[1]

- (1) paļu-sali<sup>84</sup>-a=ita=mau<sup>85</sup>, mamaini. kiļamu=na=ita  
PAŁU-sing-AV.IMP=1INCL.NOM=wish young just=DEF=1INCL.NOM  
tali-cuvuju!  
TALI-meet  
Let's sing, young men! We've just met!

[2]

- (1) s<um>ulusulu-a=ita=mau, muri-turu-turua!  
sing<AV>-AV.IMP=1INCL.NOM=wish MURI-RED-sibling  
Let's sing, siblings!
- (2) kua-ləəjəə tai-təətəərəə m-a-ləəjəə-ŋəə=ami=mu=?ai?  
KUA-miss all-real AV-IRR-miss-RED=said=2PL.NOM=perhaps  
Do you really miss (me)?
- (3) muri-turu-turua m-a-ləəjəə-ŋəə ta-taļuvatana?  
MURI-RED-sibling AV-IRR-miss-RED RED-unreal  
Do the siblings really miss each other?

[3]

- (1) paļu-safī-a=ita=mau, mamaini. masikaricu  
PAŁU-sing-AV.IMP=1INCL.NOM=wish child empty  
lakua=isa<sup>86</sup>!  
urn.for.wine=3.GEN  
Let's sing, young men! Let's drink up the wine in the big wine container!
- (2) ?au-nini masikarəə ka lakua=isa?  
like-how empty NOM urn.for.wine=3.GEN  
How can we drink up the wine in the big wine container?

<sup>83</sup> This “Happy Song” has different forms for different people. Although the melody is the same, the forms of this song as sung by informant Eleke Lhauracana are different. The forms sung by Eleke are as follows:

*aia ana a?iahina aia?ana* ‘meaningless’

<sup>84</sup> The same song may use both an obsolete form and a modern term at the same time. For example, the word ‘singing’:

*s-um-ulusulu* (obsolete form) = *paļu-a-safī* (modern term)

<sup>85</sup> =mau ‘wish, imperative’.

<sup>86</sup> *lakua=isa* ‘container for wine=3.GEN’.

- (3) pa-ari-kiaŋaļi<sup>87</sup> na vatunjalī<sup>88</sup> m-ata-lisau a salumu=isa.  
PA-ARI-incessant OBL urn.for.wine AV-begin-clean LNK water=3.GEN  
We have endless resource of wine just like the stream water, as pure as the  
stream water.

[4]

?i-m-a-ruaru!  
?I-AV-IRR-dissemble  
Let's sing, young men! We shall leave each other.

### Song 12. Head-hunting song<sup>89</sup>

musuaał

[1]

- (1) uinaui muli-vəŋjeli-u<sup>90</sup> ?uka?ani ɳausa<sup>91</sup>.  
? AV.ULI-plant-U none compete  
I am as strong as hardwood plant, without any competitor.

[2]

- (1) uinaui vuŋavuŋa viľua ?uka?ani ɳausa.  
? flower plant.sp. none compete  
The head I hunted withered like a flower, which can no longer blossom.

[3]

- (1) uinaui kilimui nakamula<sup>92</sup> kilimui camaku na vinau.  
? kill name kill smear OBL plant.sp.  
I cut a Japanese head named Nakamura. I smeared his blood on the plant *vinau*.

<sup>87</sup> *paarikiangali* = *marikiasalingusu* ‘incessant water’.

<sup>88</sup> *vatungalī*, informant Eleke Lhauracana interpreted it as ‘not dry up’, while informant Amalanamala Salapuana interpreted it as ‘urn for wine’.

<sup>89</sup> As mentioned in Section 1, Saaroa people can still memorize and sing Song 11, but they do not know any of the words, So, it is left out.

<sup>90</sup> *ŋəŋjeli* ‘tree.sp.’, this tree is very hard and used to make a pestle; *muliveyeli* means ‘as strong as *ŋəŋjeli*’.

<sup>91</sup> *?uka?anang ɳausa* or *?uka?ani ɳausa* ‘unparalleled’, *?uka?a* ‘none’.

<sup>92</sup> *nakamula* ‘Japanese surname, 中村’.

### Song 13. Hunting song

umaiapə ḷaḷa kuli

[1]

- (1) palatakaiṭia tulisi na ḥi-kuri-cani-ani tulis.  
 spear ? OBL PFV-catch-one-LV ?  
 I have a spear.
- (2) ḥami-lajica tulisi na ḥi-kuri-cani-ani tulis.  
 black-sky ? OBL PFV-catch-one-LV ?  
 I caught a black kite.
- (3) ḥatakəmənə tulisi na ḥi-kuri-cani-ani tulis.  
 muntjac ? OBL PFV-catch-one-LV ?  
 I caught a muntjac.
- (4) apilupaṭupai<sup>93</sup> tulisi na ḥi-kuri-cani-ani tulis.  
 monkey ? OBL PFV-catch-one-LV ?  
 I caught a monkey.
- (5) kəŋkəŋramucu tulisi na ḥi-kuri-cani-ani tulis.  
 goat ? OBL PFV-catch-one-LV ?  
 I caught a goat.
- (6) kuvukuvura tulisi na ḥi-kuri-cani-ani tulis.  
 pangolin ? OBL PFV-catch-one-LV ?  
 I caught a pangolin.
- (7) ḥatikasə tulisi na ḥi-kuri-cani-ani tulis.  
 deer ? OBL PFV-catch-one-LV ?  
 I caught a deer.
- (8) ḥimakaliūməra tulisi na ḥi-kuri-cani-ani tulis.  
 wild.pig ? OBL PFV-catch-one-LV ?  
 I caught a wild pig.
- (9) ḥavuruvuru tulisi na ḥi-kuri-cani-ani tulis.  
 leopard ? OBL PFV-catch-one-LV ?  
 I caught a leopard.

---

<sup>93</sup> Someone thinks *apilupatupai* means goat, while *kəŋkəŋramucu* means monkey. It is uncertain.

- (10) ɬasəməsəma tulisi na li-kuri-cani-ani tulis. iaiai  
 bear ? OBL PFV-catch-one-LV ? ?  
 I caught a bear.

### Song 14. Love song

tumaŋjitaŋi-aku

- (1) t<um>anji-tanji=aku<sup>94</sup> i t<um>u-cani<sup>95</sup> vulała.  
 RED<AV>-cry=1SG.NOM ? TU<AV>-one month  
 I've been crying for a month.
- (2) t<um>u-cani vulała i t<um>u-vuła-vułała<sup>96</sup>.  
 TU<AV>-one month ? TU<AV>-RED-blur  
 For a month, (tears) blurred (my eyes).
- (3) t<um>u-vuła-vułała i tupi?i<sup>97</sup> na ?ərəla.  
 TU<AV>-RED-blur ? blind OBL cogon.grass  
 (Tears) blurred (my eyes), which were made blind by cogon grass.
- (4) tupi?i na ?ərəla i=iau vancumaci?i<sup>98</sup>.  
 blind OBL cogon.grass I=wonder die.with.sorrow  
 Made blind by cogon grass, grief to death.
- (5) ała vancumaci?i ia, aluka-sailəŋəja.  
 and die.with.sorrow TOP very-sorrowful  
 And grief to death, very sorrowful.
- (6) misa?inta sumanə<sup>99</sup> i patali ruca-rucakə.  
 not.want spouse ? nuisance RED-angry  
 I don't want a husband, annoying, and keeping you upset.

<sup>94</sup> *t<um>anji-tanji* 'keep crying' <*tanji* 'cry'. A reduplicated form indicates continuous action.

<sup>95</sup> *t<um>u-cani* 'one (verb)' <*cani*- (noun).

<sup>96</sup> *t<um>u-vuła-vułała* '(eyes) are very blurry, suffering from cataract'.

<sup>97</sup> *tupi?i* means 'blind', and it indicates eyes were made blind by cogon grass. One's eyes were swollen from crying but made up an excuse that they were hurt by cogon grass.

<sup>98</sup> *vancu-maci?i* 'with sadness = die with sorrow'.

<sup>99</sup> *sumanə* 'spouse'.

- (7) i tavilau<sup>100</sup> sumano!  
 ? give.up spouse  
 Give up a husband!

**Song 15. Meal box song**  
**pupuŋa**
